---

Hey Guys. As your SCAT process ramps up, I have another suggestion- place an EPA person on one of the teams or heading it up. You may have plenty of USCG personnel who are trained, and that may be just fine. However, if you're needing an excellent EPA person for SCAT, I'd highly recommend Josie Clark. She was an OSC in R5, had been a Planner and RRT Coordinator and now an RPM here. She is one of the original EPA SCAT trainers and a certified Planning Section Chief and EU leader. She's kick ass! She's willing to come if you're interested. If not, no sweat. Just a thought.
